PROFESSIONAL SUMMARY

B.Tech Computer Science and Engineering graduate (GLA University, 2024) with hands-on experience building Jenkins CI/CD pipelines, automating AWS EC2 provisioning using Ansible playbooks, and deploying containerised workloads on Kubernetes clusters. Completed 6-month AWS and DevOps Infrastructure Training at Croma Campus covering Jenkins, Docker, Kubernetes, Terraform, Ansible, Prometheus, and Grafana. Proficient in Linux (Ubuntu) administration, Bash scripting, and Git-based version control. Actively seeking a DevOps Engineer or Cloud Infrastructure Fresher or Intern role.

SKILLS

CI/CD and Automation: Jenkins, CI/CD Pipeline Automation, GitHub Webhooks, Pipeline Configuration

Cloud Platform: AWS EC2, AWS IAM, AWS S3, AWS VPC, AWS CloudWatch

Containers and Orchestration: Docker, Kubernetes, kubectl, Pods, Deployments, Services, ReplicaSets

Configuration Management: Ansible, Ansible Playbooks, SSH Key Authentication

Infrastructure as Code: Terraform

Monitoring and Observability: Prometheus, Grafana

Scripting and Operating System: Bash Scripting, Shell Scripting, Linux Administration, Ubuntu

Version Control: Git, GitHub

Backend and Database: CodeIgniter PHP, MySQL

PROJECTS

AWS Resource Provisioning via Jenkins, Ansible and Kubernetes CI/CD Pipeline

Jenkins | Ansible | Kubernetes | AWS EC2 | GitHub | Linux Ubuntu | SSH | SCP

- Designed and implemented a 3-tier CI/CD pipeline on AWS EC2 integrating Jenkins, Ansible, and Kubernetes to automate AWS resource provisioning and Kubernetes pod deployment, eliminating all manual steps.
- Configured Jenkins pipeline with 3 automated stages: GitHub code checkout, SCP-based file transfer to Ansible server, and remote Ansible playbook execution via SSH, enabling fully automated end-to-end deployments.
- Developed an Ansible playbook (ec2.yml) using the amazon.aws Ansible collection to programmatically provision AWS EC2 instances, including security group creation, AMI selection, and key-pair configuration.
- Established passwordless SSH authentication between the Ansible control node and Kubernetes server using SSH key-pair generation and authorized_keys configuration, verified with ansible -m ping returning 0 failures.
- Deployed multi-container Kubernetes pods (ubuntu:latest) remotely by executing Ansible playbook (pod.yml) triggered through Jenkins pipeline, confirming Running pod state on the Kubernetes cluster.
- Provisioned and managed 3 AWS EC2 instances across Jenkins (t3.micro), Ansible (t3.micro), and Kubernetes (c7i.flex.large) in ap-south-1, using MobaXterm for simultaneous multi-node SSH session management.

Automated AWS EC2 Provisioning via Jenkins CI/CD Pipeline

Jenkins | GitHub Webhooks | AWS EC2 | AWS IAM | Bash Scripting | Linux Ubuntu

- Built an end-to-end Jenkins CI/CD pipeline to automate AWS EC2 instance provisioning, eliminating 100 percent of manual AWS console steps and reducing provisioning time from over 15 minutes to under 3 minutes.
- Developed parameterised Bash shell scripts triggered via Jenkins jobs to provision AWS EC2 resources on demand, improving deployment repeatability and reducing human error by eliminating manual input.
- Configured GitHub Webhooks to trigger the Jenkins pipeline automatically on every code push, enabling fully event-driven CI/CD execution with version-controlled auditability across 2 repositories.
- Implemented AWS IAM roles and least-privilege access policies on Linux Ubuntu to enforce cloud security best practices across Jenkins and AWS EC2 interactions.

WORK EXPERIENCE

Backend Developer Intern, Mentobile Technology

Jul 2024 – Oct 2024

- Developed and maintained backend modules using CodeIgniter PHP MVC framework, implementing server-side business logic and RESTful data processing workflows for a live production web application.
- Designed MySQL database schemas and executed full CRUD operations across multiple application modules, optimising query performance and ensuring data integrity.
- Managed source code using Git and GitHub, including branching, pull requests, and code reviews, ensuring structured version control across a collaborative development team.

Market Research Associate, Precise Research Solution, Gurugram

Jan 2025 – Jun 2025

- Collected, cleaned, and analysed structured datasets to produce decision-support reports and synthesised multi-source findings for stakeholder presentations.

CERTIFICATIONS AND TRAINING

AWS and DevOps Infrastructure Training, Croma Campus

Sep 2025 – Mar 2026

- Covered Linux administration, Git and GitHub workflows, Jenkins CI/CD pipeline configuration, and GitHub Webhook-triggered automated deployments.
- Trained on Docker containerisation, AWS services including EC2, S3, IAM, VPC, and CloudWatch, and Kubernetes cluster setup and container orchestration.
- Studied Terraform for infrastructure as code, Ansible for configuration management, and Prometheus and Grafana for system monitoring and observability.

Additional: Web Development Bootcamp (JOVAC) | Front End Development HTML and CSS (Great Learning) | Course on Computer Concepts CCC (NIELIT)

EDUCATION

B.Tech in Computer Science and Engineering, GLA University, Mathura

Jul 2020 – May 2024

CGPA: 6.83 / 10.0

Intermediate 12th Grade, Gandhi Inter College, Mathura

Apr 2019 – Mar 2020

Percentage: 67.6%

High School 10th Grade, Barari Public School, Mathura

Apr 2017 – Mar 2018

Percentage: 80.6%
